

OPEN ACCESS AND NOT-FOR PROFIT POLICY

The **Journal *Influence of Scientific Applied Research on the Quality of Modern Studies*** supports Open Access Policy by providing unrestricted, free-of-charge access to peer-reviewed Journal papers online. Editorial team strongly believes that by making Journal content freely available as broadly as possible, the Journal significantly accelerates academic discussion and progress in the field of cooperation between HEI and business world, and has vision on the following benefits:

Knowledge availability. The Journal makes knowledge and research highlights available worldwide, without the barrier of affordability. Everyone can freely access and download the full text of all published articles.

Worldwide audience. The availability of Journal content promotes growing audience from all over the world. The Journal content is available for indexing by most popular search engines so that readers worldwide can easily find necessary information. In turn, this approach promotes public engagement with research findings and forwards the dialogue on cooperation between HEI and business world more broadly.

Higher impact in the field. The Open Access Policy of the Journal results in high publicity, visibility and citation availability. The Journal allows others to use, share, and display the content publicly, subject to proper attribution of authorship.

Commitment to not-for-profit publishing model. The Journal is based on the values of global sustainability and research availability worldwide, including low-income nations, by overcoming economic barriers enforced by paid subscription-based publishers. The Journal is free of charge both for authors and readers. Furthermore, we highly appreciate our Editorial Board members, who contribute their time on a voluntary basis in their genuine effort to forward creativity and innovation-driven research around the world.
